

# Charter Flights

Aklak Air's charter services cover a wide range of customer requirements, from freight movement to passenger transport, on or off strip, across the North. To date, clients have depended on us to transport them into some of the most remote locations in the north, from glaciers on Mt. Logan (Canada's highest peak) to the frozen Beaufort Sea. Our extensive experience flying Arctic skies enables us to ensure efficient, secure, safe and reliable charter services. All our charter flights are provided by our custom selected fleet, maintained to the highest Transport Canada standards, and safety certified. The aircraft are flown by dual flight crews trained in cockpit management, each holding Transport Canada Instrument Flight ratings.

Our past charters include:

- Transporting canoe groups to most of the region's navigable rivers
- Transporting tourists, group tours, staff and researchers to all three of the region's National Parks
- Exploration for Oil and Gas Industry
- Fuel and equipment hauls
- Transporting staff and supplies to remote camps
- Whale and wildlife monitoring
- Aerial surveying
- Executive tours

We can provide you with fast, comfortable airstrip to airstrip service, and we can get you to those hard to reach off-strip destination on tundra tires or wheel-skis. We are confident we can meet all of your fixed wing charter needs.

For information on our charter services, please contact the dispatcher at (867) 777-3555 or email [charters@aklakair.ca](mailto:charters@aklakair.ca).
